A DoIT Web Hosting Linux server experienced a partial outage on 7/9, with the hosted MySQL database becoming unavailable after Linux patching. It was inadvertently patched in the test round of patching rather than the production round—this has since been corrected. This impacted web sites that rely on that server's MySQL database, approximately 9% of customer web sites.

***Cost Per Endpoint**

****Endpoints Per Technician**

*****Customer Satisfaction**

NOTES: *Cost per endpoint methodology updated for December 2021 to eliminate "complexity" as a variable and expand sample size. Gartner includes the costs of voice, peripherals, software, and external services, which we have not, as there are alternative funding models for those items. Prior values are not directly comparable to the updated methodology, and will not be recalculated. Updates will be processed annually.

**DS Endpoints per technician calculation updated for FY2023 to include AIMS endpoints and technicians, including mobile devices. Previous years values retained for historical reference and do not include mobile devices. Updated calculation redefines technician as a person rather than based on hours worked, and adds 56% of Infolab computers as managed endpoints. Calculation updated annually. Updated January 2024.

***Survey respondents rate satisfaction on a 7 point scale in response to: 'We value your opinion. How was your experience with us?'

 Network service at UW-Richland and UW-Washington County were terminated due to campus closures

 -Availability is for wired (not wi-fi) connectivity at each institution. Availability calculated as total uptime / total time per month. Wide Area Network is considered down when completely disconnected from the system (i.e. both routers down at 4-year schools, the single router down at 2-year schools). Any planned outages are included in the calculations, sometimes making availability appear below commercial standards of 99.9% or 99.99% uptime.
 -The 99.9% SLA rate with UW System is for unplanned outages; the figures in this table include all outages – planned or unplanned. SLA faults here (highlighted in RED) may not actually be an SLA agreement fault.

NOTES: Average (mean) network usage includes night and weekend readings of typically much lower traffic. Averages for UW-Madison Campus Internet Access and UW-Madison internet Exchange will likely be lower in summer months than they are during the academic year.

95th percentile usage is a more common industry standard than avg/max/min for measuring utilization; Network Services is working on providing that measure as well in future reports.

A peering exchange, such as the Madison Internet Exchange, enables networks to interconnect directly to each other and exchange IP (Internet) traffic. Peering is the exchange between two independent networks for the benefit of both networks.

The target for WAN speeds is a capacity threshold instead of a specified speed to maintain. When 95th percentile speeds reach about 45-55% of capacity, there is an engineering exploration to determine the cause of increased usage and whether increased capacity is warranted.

NOTES: * HD % Resolution = incidents resolved by the Help Desk rather than being escalated to a specific service team. The HD % Resolution targets for AT Services were derived by taking the average HD % Resolutions from the past two years for AT Learn@UW Services.

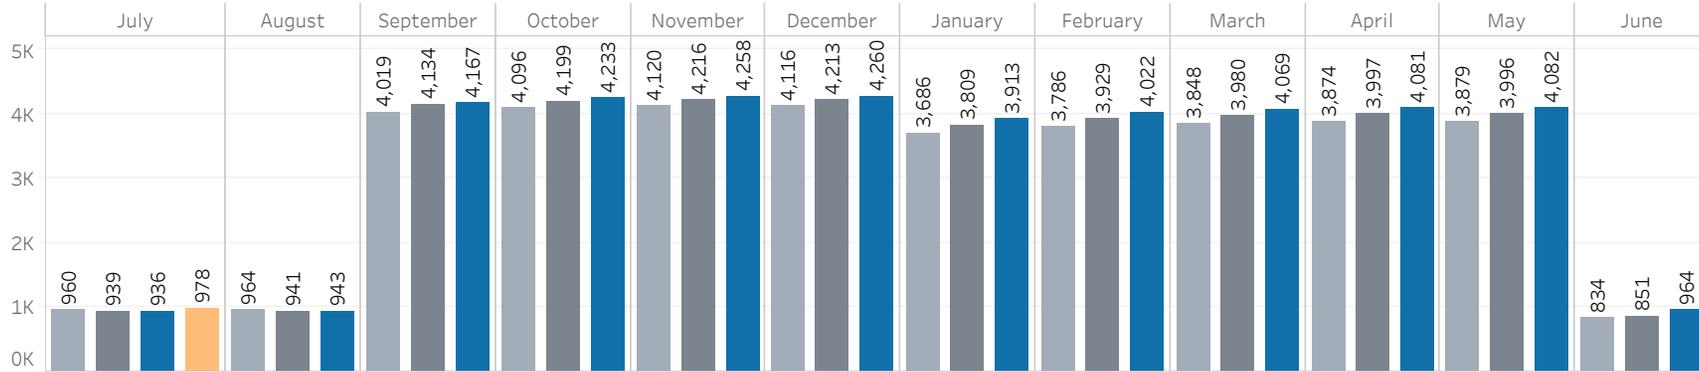

** First Contact Resolution has been defined as a phone incident opened by the Help Desk and resolved by the Help Desk, within one hour of the incident being created. As only phone incidents are looked at this metric may be blank if no phone incidents were reported for that service during the previous month.

*** Survey respondents rate satisfaction on a 7 point scale in response to: 'We value your opinion. How was your experience with us?'

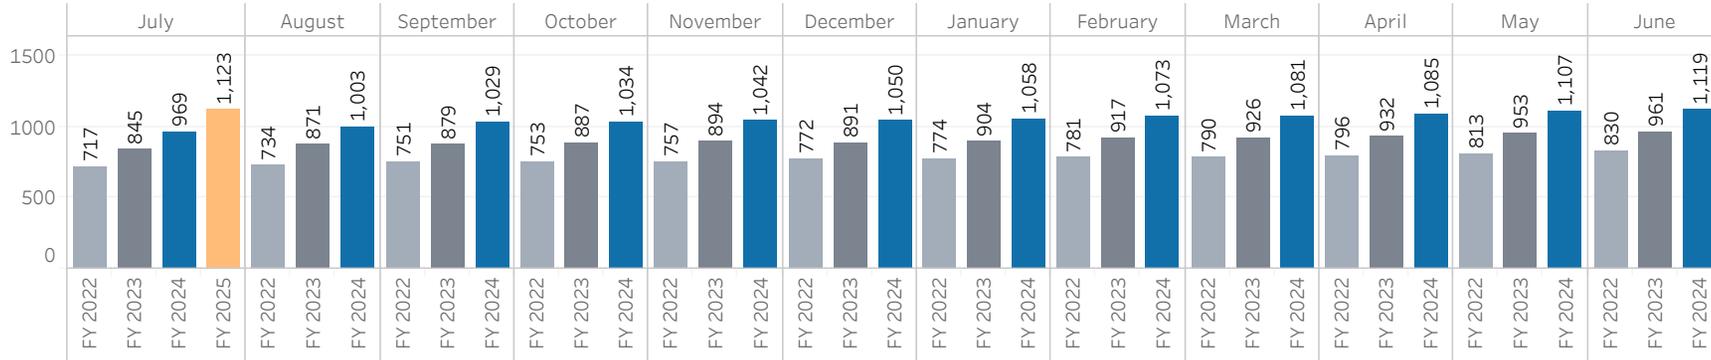

Other Learn@UW Services include Atomic Assessments, Atomic Assessments Quizzing Tool, Engage, Honorlock, Piazza, ACAR (Pressbooks, Storyline, Learning Locker, Grassblade, General Content Authoring), Top Hat, Turnitin, UDOIT

DoIT OPERATIONS: ACADEMIC TECHNOLOGY -ENGAGE E-TEXTS AND DIGITAL LEARNING TOOLS METRICS

Students Enrolled in Courses Using e-Texts

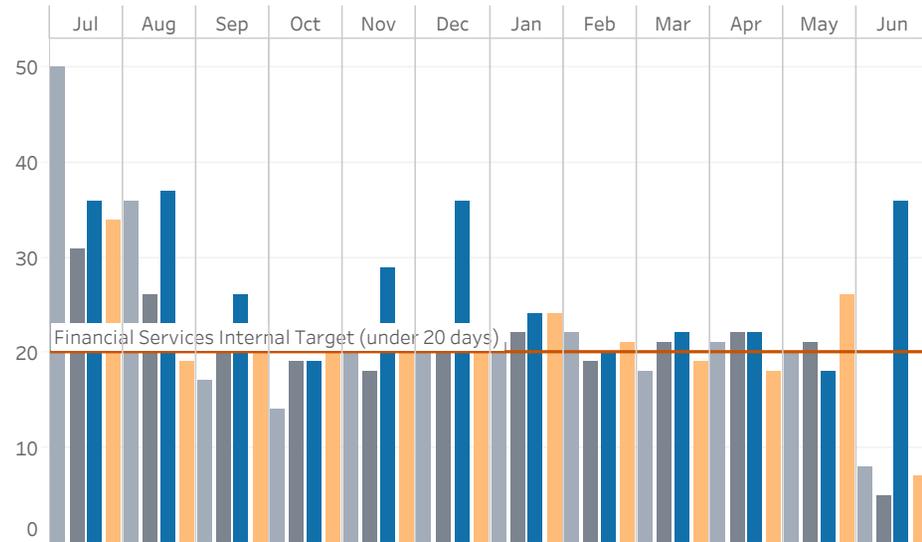

Engage e-Texts and Digital Learning Tools Savings over List Price for Print Textbooks

Since spring 2018, less than 1% of students have opted out of using neither an eText nor a publisher bundled digital learning tool when given the option. Enrollment counts are not unique. A student in 3 courses using Engage eTexts is represented as 3 student enrollments. Cost savings are based on the difference between publishers' retail prices for print textbooks and the price of digital materials made available through Unizin.

NOTES: * Indicates services in the End of Service Life (EoSL) state that are not yet fully decommissioned.
 ** Service has a High Risk Data flag set to "Yes-Vendor" - this service contains high-risk data, but is outside of UW control due to being vendor-managed and not included in completion rate. Starting Q3 FY24, these are denoted via the Vendor Managed (V) label.
 *** Completion rate represents the percent of services operated by DoIT that contain high risk data and have audit records attached per quarter. Q1 = July 1 - Sept 30, Q2 = Oct 1 - Dec 31, Q3 = Jan 1 - Mar 31, Q4 = Apr 1 - June 30. Contents reflect DoIT operated Technical Services in the CMDB marked as High Risk at the end of July FY 2025. Deactivated/decommissioned services are not included. Blanks indicate an audit record has not been completed for the service.
Pass (P) - Backups are occurring at least every 28 days, and a test restore can be demonstrated every 90 days.
Fail (F) - Backups are NOT confirmed to be occurring at least every 28 days, and/or a test restore CANNOT be demonstrated to have been done every 90 days.
